

Michael Jereme Hancock

Software Developer · Homelab Tinkerer · Plex Power User · Maker of Dumb Things

• jeremehancock.com • michael@jeremehancock.com • github.com/jeremehancock

SKILLS & TOOLING

Languages

PHP · JavaScript · TypeScript · Python · Bash · SQL · HTML · CSS

Across 111 public repos, Bash leads with 42, then JavaScript at 34, PHP at 33, and Python at 15.

Frontend

React · TypeScript · MUI · Emotion · Storybook · Design systems · Next.js · Vanilla JS · PWA · Service Workers · SVG · Accessibility

UnderCurrent is a React/MUI design system of roughly 100 components. homelab.md is a single dependency-free file.

DevOps & CI/CD

Docker · Docker Compose · Multi-stage builds · GitHub Actions · Buildx · QEMU · Docker Hub · Ansible · Vagrant · Nginx · php-fpm
GitHub Actions lints, tests, builds, and ships amd64 and arm64 images straight to Docker Hub.

Plugins & Integrations

Plex · Jellyfin · Emby · TMDB · TVDB · Fanart.tv · Blutit plugins · CMS plugins · API design · PIN-based auth
Eight PHP plugins extend Blutit. Marquee sources Plex artwork from TMDB, TVDB, and Fanart.tv. Glimpse reads Plex, Jellyfin, and Emby.

AI-Assisted Development

Spec-driven development · OpenSpec · Claude Code · Prompt-to-product
Marquee is built spec-first with OpenSpec. AI Game Collection and Dumb Projects are portfolios of AI-built apps.

Backend & APIs

PHP 8.4 · Slim 4 · PSR-4 · PHP-DI · Twig · Guzzle · Monolog · SQLite · PDO · REST · XML

Marquee's 106 classes run on Slim 4, with PSR-4 autoloading, PHP-DI wiring, Twig views, and a SQLite store.

Testing & Code Quality

PHPUnit · PHPStan · PHP-CS-Fixer · ESLint · Prettier · QE/QA
Marquee runs PHPStan at level 10, its strictest setting, plus 74 test files covering 106 source files, all gated on every push.

Linux & Self-Hosting

Ubuntu · Debian packaging · APT repos · systemd · cron · Proxmox · Raspberry Pi · Prometheus · Grafana · Node Exporter
UbuntuCE was a branded Ubuntu remix with hosted APT repos. A Pi cluster runs Prometheus and Grafana via Ansible.

CLI & Shell Tooling

Bash · curses TUI · fzf · jq · xmlstarlet · Self-updating scripts
CLIX and Ludanta are pure Bash with built-in updaters. fail2ban-tui is a curses interface built on the Python standard library.

EXPERIENCE

Software Developer II

2021 – Present

[Nexcess/Liquid Web](#)

- Build and maintain the UI for our customer-facing control panels.
- One of the original developers of UnderCurrent, the Nexcess design system, and a primary contributor since: roughly 100 React components, a full theming layer, and its own Storybook. undercurrent.nexcess.com
- Work across the full stack in a fast-paced release environment.
- Ran team-side QE/QA across a wide range of projects.
- Promoted from Software Developer I in 2021.

Software Developer I

2016 – 2021

[Nexcess/Liquid Web](#)

- Shipped UI features for the customer-facing control panels.
- Contributed full-stack work across a fast-moving codebase.
- Handled team-side QE/QA on a variety of projects.

Product Manager II

2014 - 2016

Rackspace

- Managed development of the Cloud Sites control panel.
- Worked closely with Engineering and Systems Operations to ship product improvements.
- Kept Cloud Sites on a continuous-improvement track.

Automation Engineer I

2013 - 2014

Rackspace

- Built and maintained procedures that kept the support department running efficiently.
- Built web applications for customers and support staff.
- Served as liaison to the Development and Engineering teams.

Linux System Admin I

2012 - 2013

Rackspace

- Administered Linux servers in load-balanced, clustered hosting environments.
- Troubleshot complex, multi-server failures for customers.
- Handled escalated customer issues by phone, chat, and ticket.
- Promoted from Support Technician in 2012.

Support Technician

2011 - 2012

Rackspace

- Delivered Fanatical Support by phone, chat, and ticket.
- Troubleshot customer hosting issues and drove them to resolution.
- Handled customer escalations at every level.

Web Design & Development

2004 - Present

Freelance

- Design and build custom sites for individuals, organizations, and businesses.
- Support clients by email, phone, and forum, resolving hosting and website issues.
- Handle ongoing maintenance, monthly updates, and search engine optimization.

Program Assistant

2004 - 2005

NIMH

- Advised Principal Investigators at U.S. research institutions applying for research confidentiality certificates.
- Reviewed financial disclosure, outside activity, official duty, and sponsored travel filings for every NIMH employee.
- Built and maintained the information systems that produced reports for a broad range of data requests.

EDUCATION

B.S. in Business Administration

Northwestern Oklahoma State University (NWOSU)

- Named Most Promising E-commerce Student by faculty. The web habit stuck.
